Cautionary Information

This presentation and related materials contain statements about the Company's future that are not statements of historical fact, including specifically the statements regarding the Company's expectations with respect to economic conditions and demand levels, its ability to improve network performance (including those in response to increased traffic), its results of operations, and potential impacts of public health crises, including pandemics, epidemics or the outbreak of other contagious diseases, such as coronavirus and its variants (COVID), and the Russia-Ukraine and Israel-Hamas wars. These statements are, or will be, forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements also generally include, without limitation, information or statements regarding: projections, predictions, expectations, estimates or forecasts as to the Company's and its subsidiaries' business, financial, and operational results, and future economic performance; and management's beliefs, expectations, goals, and objectives and other similar expressions concerning matters that are not historical facts.

Forward-looking statements should not be read as a guarantee of future performance or results, and will not necessarily be accurate indications of the times that, or by which, such performance or results will be achieved. Forward-looking information, including expectations regarding operational and financial improvements and the Company's future performance or results are subject to risks and uncertainties that could cause actual performance or results to differ materially from those expressed in the statement. Important factors, including risk factors, could affect the Company's and its subsidiaries' future results and could cause those results or other outcomes to differ materially from those expressed or implied in the forward-looking statements. Information regarding risk factors and other cautionary information are available in the Company's Annual Report on Form 10-K for 2023, which was filed with the SEC on February 9, 2024. The Company updates information regarding risk factors if circumstances require such updates in its periodic reports on Form 10-Q and its subsequent Annual Reports on Form 10-K (or such other reports that may be filed with the SEC).

Forward-looking statements speak only as of, and are based only upon information available on, the date the statements were made. The Company assumes no obligation to update forward-looking information to reflect actual results, changes in assumptions or changes in other factors affecting forward-looking information. If the Company does update one or more forward-looking statements, no inference should be drawn that the Company will make additional updates with respect thereto or with respect to other forward-looking statements. Rail – Safest Freight Transportation

- Lower employee injury rates than most major industries - trucking, airlines, mining, even grocery stores
 - Rails have reduced employee casualty rates by 63% since 2000, and 15% since 2013
- More than 99.9% of hazmat shipments arrive safely
- 16X more fatalities in road-related hazardous materials incidents vs rail from 1975 – 2021
- Rails prioritize safety
 - Invested more than \$260K per mile of track on network improvements, or ~\$760B over the last 20 years
 - Wayside Detectors Installation, AI and Machine Learning Utilization, Automated Car & Track Inspection
 - Positive Train Control

Keeping Communities Safe

More than 7,000 wayside detection devices monitor the condition of equipment in real time.

Hot Box Detectors

measure bearing temperatures.

Wheel Impact Detectors

measure force exerted by an out-of-round wheel.

Wheel Temperature Detectors

measure the temperature of the wheel plate.

Wheel Profile Detectors

measure wheel shapes with lasers to determine wear.

Acoustic Bearing Detectors

record bearing sound signatures.

Machine Vision Systems

Analyze captured images to identify defects.

Wayside detectors generate more than 16M data points that send immediate alerts, allowing Union Pacific to stop train immediately, repair at next planned maintenance visit or repair at next location
